2024 BULL SALE

Ardrossan Angus will be selling bulls in a cost-effective, buyer-friendly model in 2024. 2024 has provided a challenging year for beef producers in Victoria and Southern NSW, to accommodate this we will be offering this year's bulls for private selection commencing on **Wednesday 28th August from 11am**. Bulls will be penned in various prices.

SELLING LOCATION:

5069 River Rd, Talmalmo, NSW, 2640

- From Albury – 50 mins
- From Wagga Wagga – 80 mins
- From Holbrook – 35 mins
- From Jingellic – 12 mins

OFFERING DETAILS:

Bulls will be on display for our **Open Day** on **Wednesday 21st August from 11am**.

Bulls will be for sale on **Wednesday 28th August 2024 from 11am** onwards via private sale.

Inspections can be arranged at any time by appointment.

Rob Bulle 0407 369 203, Shaun Darmody 0487 654 309

LOT VIDEOS:

Individual Bull
videos are available.

COMMISSION:

A 6% commission will be offered to agents who attend prior to or at point of sale.

RETAINED OWNERSHIP:

Ardrossan Angus retains 50% semen share and marketing on all bulls included in the 2024 sale. The semen share carries forward if any bulls are sold to another breeder.

FREE DELIVERY ON ALL BULLS

Ardrossan Nectar Q67

Ardrossan Nectar Q67 represents years of selection and decades of stacking pedigrees for economically important traits at its best, Q67 performed very well in Angus Australia's progeny test. Ranking in the top 1% for claw, +36 Docility, +3.0 for scrotal, -8.8 for gestation length, 3.4 for birth weight and +132 for 600-day weight.

Q67 is the most consistent sire we have used in many years, he is a breed leader for structure and docility.

We have observed a profound increase in emphasis in commercial and stud breeders selecting for structure and docility.

Ardrossan X15, Ardrossan A2 and Ardrossan A241 were all high registration sires and breed leaders for structure and docility.

Q67 has been used in our herd for the last four years and will be used extensively for years to come.

Few bulls offer what Q67 does in terms of structure, docility, carcass traits and days to calving in his daughters. One of the best balanced bulls we have produced for some years.

Structure and Docility add Longevity!

SALE BULL INFORMATION

Ardrossan Angus 2024 Sale Bulls are all rising two-year-olds, HBR registered and fully Parent Verified to both the HBR Sire and HBR Dam. All animals in the Ardrossan Angus Herd are tested through HD50K genomic testing. This year's sale offering are all extremely docile, and show good muscling and thickness. they are all clean sheathed and range from frame score 5.5 to 6.5.

All bulls have been structurally assessed by Liam Cardile and vet-checked by Dr Seumas McKillop. All bulls have up-to-date health treatments, vaccinated with Vibrio, Pestiguard and 7 in 1 and all bulls tested negative for pestivirus.

All sale bulls have been used in our HBR, MBR and commercial herd in the 2023 Joining season (1st November 2023 to 29th December 2023), adding value as they have successfully completed their first natural breeding season without injury. The entire offering of the 2024 sale bulls average in the top 20% for IMF and the top 30% for Angus Index.

50% of this years bull selection are suitable for heifer joining.

ALL BULLS ARE:

- ✓ HBR Registered
- ✓ Parent Verified
- ✓ HD50K Genomic Testing
- ✓ Vet checked by Dr. Seamus McKillop
- ✓ Structurally assessed by Liam Cardile
- ✓ Completed a breeding season
- ✓ Tested Negative for Pesti Virus
- ✓ Up-to-date health treatments
- ✓ Freeze brand with management number.

ARDROSSAN ANGUS TEAM

Rob and Sally Bulle and their valued team have been breeding Herd Book Registered Angus and Ultrablack cattle for 37 years. Throughout this time, they have faced many challenges including droughts, floods fires and most recently the toughest Winter in many years. Rob and Sally share a passion for breeding docile, structurally sound, profitable and functional cattle.

The strongest link throughout the last 37 years has been the team behind Ardrossan Angus.

John Whitely has been working with Rob and Sally for 16 years. John is a valued member of the Ardrossan Angus team and the Holbrook community. John's district knowledge proved to be an incredible asset during the 2020 bushfires.

Shaun Darmody has a key role in the Ardrossan Angus team and is a passionate leader of our breeding program. Shaun's background in agribusiness and seven years with us has led to extensive growth within the industry.

Lachie and Becky Bulle both are working in the family business. Since leaving school Lach has been a large driver of improving our cropping enterprise, machinery maintenance and infrastructure development. Becky is currently studying a double degree in Agribusiness and Accounting whilst working full time at Ardrossan Angus, Beck plays a large part in the cattle operations of our business.

Hugh Byrne and Tom Scheetz are both studying Agriculture in Wagga Wagga whilst working part time at Ardrossan. Hugh grew up in Echuca and is studying Agriculture at CSU Wagga Wagga. Tom Scheetz grew up on a mixed farming operation at Culcairn and is Studying a Cert 4 in Agriculture in Wagga Wagga.

Ali Bulle has recently completed a Bachelor of Veterinary Medicine and has commenced a job at Oamaru in New Zealand as a qualified VET and has a strong interest in dairy medicine. Kate Bulle graduated Year 12 in 2023 and has since completed a Private Pilot's License. Kate is currently working at Nappa Merrie Station for Kim and David Coulton in South Western Queensland.

Low birth, heavily muscled, calving ease and excellent EMA and IMF.

UPCOMING U BULLS

We have some interesting new sires coming through our program going into the 2024 joining season. U Bulls will be used as yearlings in our cow herd from 1st November before they become available for sale.

One of the many exciting bulls coming through our program is Ardrossan Apparatus U22. U22 is a two year old heifers first calf sired by the New Zealand bull Rissington Sovereign Q485. Sovereign has emerged in New Zealand where his two year old daughters have shown tremendous rebreeding fertility. Ardrossan Apparatus U22's dam is Ardrossan Dianna S80, S80 is the highest HBR Eye Muscle Area (+23.2 EMA) cow in the Angus breed, being 3.6 times greater than breed average for EMA.

S80 is displaying outstanding fertility just like Sovereign. She calved as a 2 year old heifer and re-joined in our 2023 AI program to Woodhill Comstock, she is due to calve with her second calf on 18/8/2024.

U22 is the only HBR registered bull born in 2023 in the top 1% of the angus breed for both EMA and IMF. This bull offers a breed-leading, rare combination of both EMA and IMF. He has been nominated for the 2024 Angus Australia Benchmarking Program.

Challenges of Tough Seasons

The Autumn and Winter of 2024 has proven to be challenging for beef producers in southern Australia. Our Autumn pasture growth rates are the lowest we have ever seen at 5 to 8 kilograms of dry matter per hectare per day. Some producers have drawn similarities to 1967. Soil temperatures have been extremely low this winter (sub 5 degrees) which has resulted in no growth.

To manage these challenges during Autumn and Winter, we have placed large numbers of cattle in containment on several properties.

Our spring calving pregnant cows were in contained in sacrifice paddocks and fed 70 megajoules of energy per day.

By destocking pastures to maintain ground cover during Winter they have responded very well to the late July rain.

As we reintroduce cattle to some Phalaris and Ryegrass pastures, we have observed clinical signs of Phalaris staggers which is rarely seen across our properties.

This year cows are calving on very short pastures low in magnesium which presents grass tetany challenges for many producers. To manage this challenge, we have made dry lick to supplement magnesium in the cow's diet.

Feeding 400 heifers behind a hot wire has also proven very cost effective with close to 100% utilisation of feed. Effective feeding in containment can be set up with little cost whilst creating labour savings by feeding large mobs in one area.

2024 has reinforced the value of hay and silage commodities stored on farm, our fine chop pasture and canola silage protein levels ranged from 14.4 to 15.5 % crude protein. This High quality fine chop silage with 9.35 Megajoules of energy has proved very cost effective in containment feeding this year.

Looking forward to the Spring this year, we aim to further conserve large quantities of fine chop silage.

Calving has commenced with 75% of our registered calves due to calve to one round of fixed time AI. This is a testament to the fertility of our herd and the discipline we apply to our breeding program.

We are very proud of the structure and udder quality in our cow herd, we welcome your inspections and feedback anytime.
