DISCLAIMER

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

SALE DAY INFORMATION

OFFERING DETAILS:

Open Day: Friday 14th August from 11am.

All 99 bulls on display for inspection.

Sale Day: Wednesday 26th August,
12:30pm.

99 Angus Bulls on offer through AuctionsPlus.

Inspections can be arranged at any time by appointment.

Rob Bulle 0407 369 203

Shaun Darmody 0487 654 308

SALE LOCATION:

'Talmalmo' is situated at 5069 River Rd, Talmalmo, NSW; 20km West of Jingellic.

- From Albury – 50 mins
- From Wagga Wagga – 80 mins
- From Holbrook – 35 mins
- From Jingellic – 12 mins

BULL LOT VIDEOS:

Individual lot videos of bulls are available at:
www.youtube.com/@ardrossanangus7622

REBATES:

A 3% rebate will be offered to agents who attend prior to or at point of sale.

RETAINED OWNERSHIP:

Ardrossan Angus retains 50% semen share and marketing on all bulls included in the 2026 sale. The semen share carries forward if any bulls are sold to another breeder.

CATERING

We invite you to join us for a free morning tea and lunch.

ACCOMMODATION:

Holbrook Motel +61 2 6036 2099

Jingellic Hotel +61 2 6037 1290

Woomargama Hotel +61 2 6020 5232

CONTACT US:

SUPPLEMENTARY SHEET

Will be available on sale day on AuctionsPlus. Individual weights and scrotal circumference will be listed.

FREE DELIVERY TO MAJOR CENTRES

2026 SALE BULLS

REGISTRATION

All bulls in this offering are Herd Book Registered (HBR) with Angus Australia and have undergone HD50K genomic testing by Zoetis, ensuring the highest standard of accuracy. Parentage is fully assured to both sire and dam, providing complete confidence in the genetic background of every animal. Each bull is also free by pedigree or tested free of all genetic disorders.

STRUCTURALLY ASSESSED

All bulls have had independent structural assessment by Liam Cardile to ensure they meet a high standard of soundness. Each animal has been evaluated for structural correctness. This provides confidence that the bulls will deliver longevity, durability and reliable paddock performance in a range of environments.

FERTILITY

Our fertility standards are backed by independent assessment, with every bull fully vet-checked by Seumas McKillop of Holbrook Vet Centre. This includes a thorough inspection of physical soundness and palpation of the reproductive anatomy, ensuring structural integrity and functional capability. Each bull also undergoes measurement and detailed examination of the testes, providing confidence in long-term breeding soundness.

HEALTH

All bulls are presented in upmost health with JBAS 8 status and comprehensive veterinary testing. All bulls have been tested negative to pesti virus, and fully vaccinated with Ultravac 7in1, Vibrovax and Pestigard, followed by their booster 5 weeks later.

ALL SALE BULLS ARE:

- ✓ **HBR Registered with Angus Australia**
- ✓ **HD50K Genomic Tested by Zoetis**
- ✓ **Parent Assured (Verified to both Sire and Dam)**
- ✓ **Free by pedigree or tested free of Genetic Disorders**
- ✓ **Fully Vet Checked by Seamus McKillop, Holbrook Vet Centre (2/6/2026)**
- ✓ **Structurally Assessed by Liam Cardile (16/6/2026)**
- ✓ **Tested Negative for Pesti Virus**
- ✓ **Vaccination and booster: Ultravac 7in1, Vibrovax and Pestigard**
- ✓ **Drenched with: Exifluke 240 Oral Flukicide and Triolab LV (flake and worm)**
- ✓ **Backlined with: Deltafix Pour-On (flies and lice)**

AuctionsPlus

2026- SALE FORMAT – HELMSMAN SELLING SYSTEM AUCTION

The Helmsman Selling System Auction combines the best features of a traditional auction system and private treaty, by creating a more considered and buyer-friendly environment. Unlike conventional auctions, this system gives purchasers ample time to evaluate and place genuine bids on any bull of interest at any point during the sale period. You're free to reassess each lot without the pressure of making split-second decisions, allowing for more strategic and confident purchasing. Bulls can be secured regardless of the lot order, giving you full control over your selections. If you're looking to purchase multiple bulls, the system also enables you to better manage your average spend and stay within your budget, making it a smart, flexible option for buyers seeking quality and value.

How the Sale will work:

1. Prior to or on arrival of sale, intending purchasers need to register online through AuctionPlus (staff available on the day to assist with any of this).
2. All bulls are displayed for inspection prior to and during the sale.
3. When the sale commences at 12:30pm all bulls are on the market, on AuctionsPlus simultaneously. You may bid on any animal regardless of lot number.
4. Contest bids in multiples of no less than \$1,000 from 12:30pm to 1pm, then no less than \$500 from 1pm onwards.
5. The sale will remain open for 30 minutes initially, until 1pm. At the conclusion of the 30 minutes, a 2 minute bid clock will commence. A bid on any lot will restart the countdown clock. Any further bids on any lot will trigger the same process, until a full 2 minute "no bid" period. This will conclude the sale on all lots.
6. All lots are open for purchase for the full duration of the sale and all lots will conclude at the same time.
7. If your "first choice" animal goes beyond your limits you can still bid on any other animal in the sale.
8. If you require assistance in relation to bidding through the Helmsman Selling System Auction, please don't hesitate to get in touch with the Ardrossan Angus Team, Elders or Corcoran Parker. Support is available prior for and/or on sale day.

Buying bulls better: Understanding all the numbers

Determining your priorities and understanding the EBVs

Bulls are a significant investment in your beef enterprise. Do you know what you want your bull to achieve, and how to select genetics that will help you get there?

Join Nancy Crawshaw from Angus Australia and Walwa/ Tumbarumba Veterinary practice (Jingellic event) for a practical workshop on setting production goals and using bull genetics to achieve them.

Our hosts and speakers will cover:

- setting breeding goals that align with your market and farm objectives
- interpret Estimated Breeding Values (EBVs) to select bulls that deliver long-term production gains
- learn how to structurally assess bulls and combine with your knowledge of EBVs to select bulls to suit your herd's needs
- insights from stud breeders on their breeding and selection approaches
- pre-joining bull health and management requirements.

There will be plenty of opportunities to ask questions, discuss local challenges and hear what other producers are doing. Lunch and morning/afternoon tea will be provided.

UNDERSTANDING EBV'S TABLE

BIRTH			
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2-year-old heifers.	Higher EBVs indicate fewer calving difficulties in 2-year-old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2-year-old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MATERNAL			
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Mature Body Condition Score	Score	Genetic differences between animals in the body condition of mature females.	Higher EBVs indicate more body condition of mature females.
Mature Cow Height	Cm	Genetic differences between animals in the height of mature females.	Higher EBVs indicate taller mature females.
Milk	Kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
Days to Calving	Days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	(%)	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	(%)	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
FEED EFFICIENCY			
Net Feed Intake (Feedlot)	Kg/Day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
Claw Set	Score	Genetic differences between animals in claw set.	Lower EBVs indicate more curl of the claw set.
Foot Angle	Score	Genetic differences between animals in foot angle.	Lower EBVs indicate less heel depth.
Leg Angle	Score	Genetic differences between animals in leg angle.	Lower EBVs indicate a more angular leg angle.
SELECTION INDEXES			
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self-replacing herd using Angus bulls.	Higher selection index values indicate greater profitability.

BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Liam Cardile of 'BEEFXCEL' service many of the leading seedstock herds in Australia.

'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry. Liam is a fully INDEPENDENT assessor.

ARDROSSAN STRUCTURAL PROGRAM:

The 2026 Ardrossan Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Ardrossan sale bulls were assessed by Liam Cardile of BEEFXCEL.

LIAM CARDILE

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM Call Liam Cardile on 0409 572 570

LOT 1-75

24-month-old Bulls

PROVEN

- Over 65% of these bulls completed a natural joining season as a yearling.
- Lot 41-62 completed their natural breeding season in Longreach, QLD, at 15 months of age. Due to the extended wet Summer in Longreach, these bulls returned home mid-May 2025.

See inside back cover for details on these bulls joining.

Bull Group Averages:

- ↗ Strict assessment of structure and phenotype – see table to the right
- ↗ IMF +3.8
- ↗ Top 30% Selection Indexes: Angus Breeding Index (\$A) + Angus Breeding Low Feed Cost Index (\$A-L).

AVERAGE STRUCTURAL ASSESSMENT ON BULL GROUP 16/06/2026

LOT 76-82

18-month-old Bulls

PEDIGREE

These ET Bulls were purposely selected, combining some of Ardrossan's most proven donor dams.

All donor dams of these bulls were selected at a mature age by:

- ↗ Strict assessment of structure and phenotype
- ↗ Top fertility data records (group average top 25% in the breed for DTC)
- ↗ Successfully reared 4 natural calves by 5 years of age.

V451 sits in top 1% of breed for \$A-L (503), ranking 19th in the entire Angus HBR breed in 2024, also in top 1% for CW (+109) and 600WT. Hard to find bulls with top end growth and calving ease. This pedigree traces back to dam of GT Miss Traveller 58 (GT Max dam) and combines the famous Back Track Eclipta 135 cow. A very good choice to improve structure.

Good natural thickness and shape displayed in this So Right son with high docility. His dam S19 has documented outstanding fertility with a 356 day calving interval. Think of how much extra weight would be achieved in a herd that calves early, every 356 days and how this would add to the business balance sheet. Foot scores are as good as it gets! A Nice blend of growth, EMA and CW.

Angus Australia Disclaimer and Privacy Information

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

Buyers option to opt out of disclosing personal information to Angus Australia

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents _____

from member _____ (name) do not consent to Angus Australia using my name address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Authorised Name: _____ Signature: _____

Date: _____

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350

HALTER AT GLENLOGIE (JINGELIC, NSW)

4 MONTHS OF VIRTUAL FENCING

Adoption & Purpose: Over the past four months, we have integrated Halter collars across our entire MBR registered Ultrablack herd at Glenlogie. The decision was driven by clear objectives of lifting pasture utilisation, improving labour efficiency and gaining deeper, real-time insight into the performance of our breeding females. What began as a morning tea conversation, has quickly become a fundamental part of Glenlogie's management.

Impact on Cattle Performance & Management: The technology has allowed us to not only virtual fence but also monitor behaviour, health and grazing patterns with a level of precision that was previously impossible. This technology has already strengthened our ability to identify both higher and lower performing animals earlier, protect high-value pastures and drift cattle into new mobs by the click of a button. The Ultrablack cows and heifers have responded exceptionally well to the change in management, completing training within days, we haven't looked back!

Value to Our Clients: The adoption of Halter by Ardrossan Angus has allowed an environment where health, fertility and pasture performance are monitored, recorded and assessed with unprecedented accuracy. Our herd is now managed with increased insights, improved grazing efficiency and greater consistency in maternal and fertility performance. Halter has strengthened our ability to measure, manage and select performance with confidence, ensuring the genetics we offer continue to move our clients' herds forward.

FERTILITY IS THE NUMBER ONE DRIVER OF PROFITABILITY!

We're leveraging the fertility data captured through Halter to identify females that reach puberty and conceive early, return to oestrus and re-conceive consistently and maintain tight calving intervals. By tracking individual behaviour and fertility, we can now rank females with far greater accuracy, remove guesswork and fast-track the most fertile lines through our program. We are already pinpointing sire and female lines within Ardrossan Angus showing elite fertility performance, with progeny consistently reaching puberty earlier, and at lighter weights, giving us a clear advantage in driving fertility-led genetic progress.

1,000 ARDROSSAN ANGUS HEIFERS IN QLD

1,000 Ardrossan Angus heifers spread across an 11,000 acre paddock in Western QLD, where they've grazed for the past year.

In April–May 2025, when the season tightened in Southern NSW, we made the call to move our 7-month-old weaner heifers north to Dalmore, Longreach. What started as a drought-management decision, has turned into one of the most valuable performance-testing opportunities we've ever had.

Running every heifer together, in the one paddock, under the same conditions, gave us unmatched precision on the performance assessment of growth, fertility and efficiency. A rare opportunity, a rare dataset and a 1-in-100 Central Queensland season to top it off! All heifers completed a natural joining window in late 2025, with all data submitted to Angus Australia, as well as benchmarked internally. As the season finally broke in Southern NSW, we were able to truck our PTIC stud heifers home.

Fertility is the single biggest determinant of long-term herd profitability. More calves born, more calves weaned and more opportunity for selection pressure. Our QLD agistment opportunity allowed us to push fertility harder than ever before.

Lots 41 – 62 completed a natural joining as a yearling with these heifers in Longreach, QLD.
